

The Advantage?

Our **GUARANTEED WARRANTY** program is designed with the customer in mind.

FIRST, it's free! No extra cost, No hidden fees and No underlying statements.

Second, it protects you from first-time installation or operational mistakes that are typically non-warrantable.

Third, we give you a comprehensive failure analysis that not only explains why the turbo failed, but lets you know if more serious underlying engine problems exist.

Fourth, our willingness to accept all first-time failures is your assurance that a quality product stands behind our commitment.

The Difference?

Many warranties can sound like strong coverage until your turbo fails. Then someone has to determine the cause of failure. That's when you find out if you really have a warranty.

Under our **GUARANTEED WARRANTY** program, if any failure occurs within 12 months of purchase, your turbo is repaired or replaced at no charge the first time, regardless of why it failed, regardless of fault, **GUARANTEED!**

THE INDUSTRY'S BEST TURBO ASSURANCE

Improve your maintenance program

Our **Guaranteed Warranty** program for turbochargers is your assurance of the best quality and the best resource for your engine's turbocharger needs. We specialize in turbochargers and fuel systems and know them inside out! The value this has to you is that professional equipment operators view our company as an extension of their equipment maintenance department.

Did you know that over 80% of all turbocharger failures are caused by conditions that are not covered under typical warranties by manufacturers? **These failures include, Foreign Object Damage, Contaminated Lube Oil, Lack of Lubrication, and High Exhaust Temperatures.** These conditions are clearly not the fault of the material and workmanship of the turbocharger. But with Guaranteed Warranty, you're covered!

We view our relationships with customers as a partnership for equipment maintenance. This means we use our expertise to provide you with valuable feedback with why your turbocharger failed. This is something few companies are trained to do. We put this knowledge to good use by providing you, the equipment owner, with information relating to why your turbocharger failed so you can avoid a repeat. When our customers experience a turbocharger failure, we perform a complete disassembly and failure analysis report and provide that to you, No Charge!

The turbocharger becomes the heart of the engine it's applied to. It sees all of the engine's exhaust, intake air, and runs the lubricating oil through a precision bearing system. Failure analysis feedback on a turbocharger gives equipment maintenance professionals a leg-up on knowing what's going on inside their engines.

Experience the advantage of having professional turbocharger specialists on your side, and knowing no matter what the cause of failure, on the first event, you've got Warranty... Guaranteed!

Warranty Statement

Our service replacement turbochargers for diesel engines are warranted to be free from defects in material and workmanship. This warranty is extended to the original purchaser for 12 months from date of purchase. There is no mileage limitation within the first 12 month warranty period.

Under our **Guaranteed Warranty** program *ALL FIRST TIME FAILURES* shall be accepted. We will, at our option, repair or replace the failed assembly. A failure analysis will be performed on the turbocharger then documented.

The **Guaranteed Warranty** policy is a customer service/maintenance assistance program. Warranty acceptance under the program is not an admission of fault or responsibility for any related or consequential damages.

The **Guaranteed Warranty** policy coverage is limited to commercial and industrial diesel engine applications such as, trucks, construction equipment, agricultural tractors, and full size pickups. All passenger cars and "Mini Pickup Trucks," both gasoline and diesel powered, are excluded from the Guaranteed Warranty program.

Guaranteed Warranty does not apply to any turbocharger installed upon an engine that it was not originally designed for such as competition type vehicles.

The failed turbocharger core must be returned prior to warranty acceptance.

Any subsequent failure that occurs within the remaining warranty period may be accepted for warranty but is subject to our determining, "CAUSE OF FAILURE," prior to warranty acceptance.

Warranty shall not apply to any subsequent failures which have been improperly installed, subjected to misapplication, improper operating conditions, accidents, or neglect; or which have been improperly repaired or altered or otherwise mistreated by the owner or his agent.

Except as set forth in this warranty, we disclaim any implied warranty, including implied warranties of merchantability and fitness for a particular purpose. We also disclaim any liability for incidental or consequential damages including but not limited to labor for removal and replacement.
