

Remanufactured ISX Injectors

Program Highlights

Our customers will receive a premium remanufactured injector produced by and under the technical expertise of one of the largest Original Equipment diesel fuel injection manufacturers in the world. Delphi Technologies is offering three part numbers covering the most popular ISX applications.

Delphi Technologies is the only aftermarket remanufacturer to reverse engineer and include a new ISX nozzle 100% of the time. The nozzle body, nozzle body plunger assembly and check valve are critical to product life and performance and will give our customers the quality and durability they can rely on. Each ISX injector is tested on a custom production test machine and all units are overchecked for leaks, injection pressure, fuel delivery and timing.

Features	Benefits
100% new nozzle body replacement ensure correct flow and atomization	More consistent performance, confidence and reliability
100% replacement of critical nozzle check valve components (spring seat, retainer, valve seal and spring)	Guarantees OE quality, performance and durability
100% O-ring replacement	Proper sealing

- /// 90 day, no-hassle warranty
- /// Two year warranty or 125,000 miles on highway
- /// Over 30 years of technical expertise

Did You Know?

Reducing the level of emissions is critical in today's diesel engines. Delphi Technologies is a leader in this technological revolution with its advanced fuel injection systems. Delphi Technologies functionally tests 100% of its remanufactured product to ensure the highest quality.
