

# Aftermarket On-Road Diesel Particulate Filters

The DPFXFIT™ by Global Emissions Systems Inc (GESi®), is an aftermarket replacement Diesel Particulate Filter (DPF) for on road heavy duty diesel applications. DPFXFIT is designed as an exact direct replacement for all common OEM DPFs from model year 2007 and newer.

DPFXFIT™ uses the highest quality stainless steel parts for long term reliability and durability to meet the harshest operating environments for on-road heavy duty diesel trucks. DPFXFIT™ units are designed for ease of installation and removal and come with replacement gaskets - saving you time and getting you back on the road sooner.

The DPFXFIT™ will allow you to meet the regulatory emissions requirements throughout Canada and the 49 US states. The unit comes with an **UNLIMITED MILEAGE, TWO (2) YEAR WARRANTY**.

GESi® and the DPFXFIT™ line utilize certified third party labs to meet or exceed emissions requirements based on OEM standards.

## DPFXFIT™ - Heavy Duty DPF

### Aftermarket replacement DPF for leading OEM units

- On road heavy duty diesel truck and bus
- On road light and medium duty diesel truck

### Design considerations

- Designed and built in North America
