WWW.DIESELUSA.COM

MFE wheel is made with a 0.187" larger exducer diameter than stock wheel, allowing for greater airflow through the turbocharger.

0.187"
Larger
Exducer

0.216"
More Wheel

MFE inducer height is made 0.216" taller than stock wheel, pulling more air through the turbocharger.

**Wheel comes pre-installed, shown for representational purposes only.*
